Secure support when entering and exiting

Energy efficiency A++  
 $U_w \leq 0.14 \text{ W}/(\text{m}^2 \cdot \text{K})$

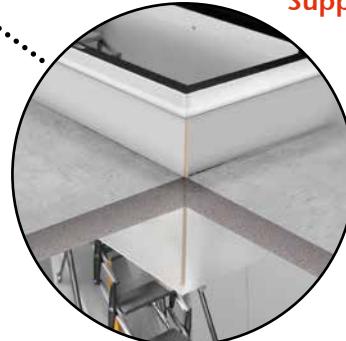

Burglar-resistant stainless steel hinges

Telescopic handrail mounted on the right

Supplied with clamping rails

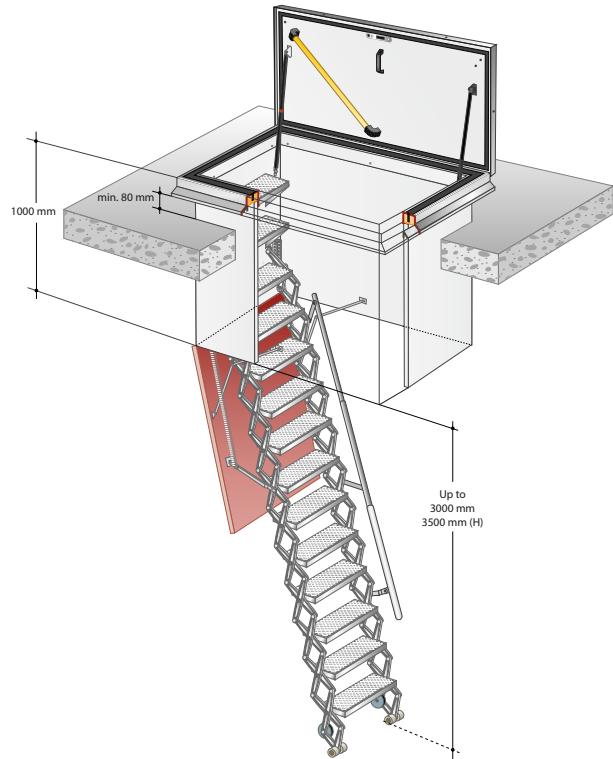

Opening width and length:  
700 x 1400 mm  
1000 x 1500 mm

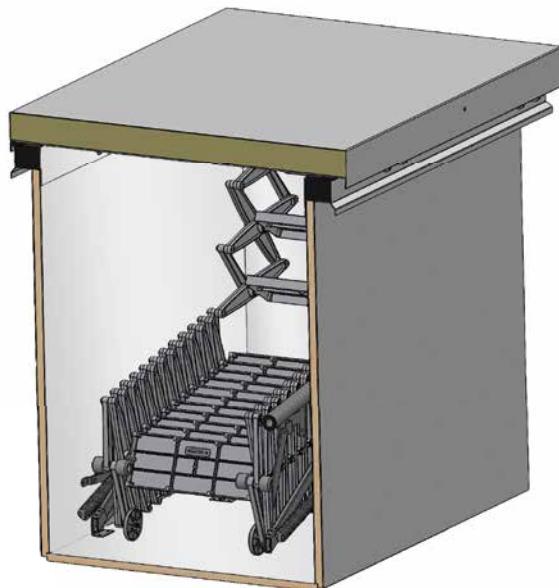

## All the advantages of Gorter®

Discover the revolutionary RHTS roof hatch with integrated scissor stair for seamless installation in the roof. This innovative system not only provides safe and practical access to the roof, but also offers an ideal solution for a wide range of flat roofs thanks to its easy installation.

Read on and discover all the advantages that Gorter has to offer.

1

### Installed in three steps, it couldn't be easier

Gorter roof hatches are delivered ready for installation and are already fully assembled upon delivery. The three installation steps are: position the roof hatch, secure it with screws, and seal it.

2

### Safety is a top priority

Gorter roof hatches can be opened and closed with one hand. The automatic locking mechanism in the open position provides a secure hold when entering and exiting.

3

### Robust and durable construction

Gorter flat roof hatches are robustly constructed. They are powder-coated in two colours and equipped with a stainless steel Euro profile cylinder lock. All materials are fully recyclable.

4

### Convincing technology with 10-year warranty, CE and TÜV NORD certification

Gorter roof hatches are supplied with a 10-year warranty. Safety, performance and construction of the roof hatches, stairs and ladders are CE and TÜV NORD certified. A 1-year warranty applies to electric operation and stairs.
